IMPLEMENTATION AND SOURCE GUIDE

This is a school-level weekly scheme derived from NaCCA's official 2019 Standards-Based Curricula for Lower Primary (Basic 1-Basic 2). It organises Basic 2 content into three 12-week school terms.

Each term has Weeks 1-10 for teaching/application, Week 11 for revision and targeted remediation, and Week 12 for end-of-term assessment, correction and feedback.

Where an exact Basic 2 indicator has been verified, it is shown. Where a week combines or extends several official indicators, a curriculum-family reference such as B2.1.*.* or MULTI B2.* is used rather than inventing a false single official indicator.

English Language is organised so Oral Language, Reading, Grammar/Usage, Writing/Conventions and Extensive Reading are represented every week.

NaCCA's current 2019 curriculum page lists standalone French and Computing curriculum PDFs for B4-B6, not B1-B2. Because the school/user specifically requested both for Basic 2, the French and Computing sections in this document are labelled SUPPLEMENTARY / SCHOOL-ADDED transition programmes. They deliberately use SUP-B2-FR and SUP-B2-COMP reference codes rather than pretending to be official NaCCA B2 indicator codes.

OWOP is included because the user requested the same all-subject combined format used for the higher primary classes. NaCCA currently notes that from 2024/2025 OWOP content is accommodated in related Primary subjects; schools should therefore align timetabling with current NaCCA/GES directions.

Core competency abbreviations used: CP = Critical Thinking and Problem Solving; CC = Communication and Collaboration; CI = Creativity and Innovation; PL = Personal Development and Leadership; DL = Digital Literacy; CG = Cultural Identity and Global Citizenship.

SUBJECTS INCLUDED

English Language; Mathematics; Science; History; Computing (Supplementary); Religious and Moral Education; Creative Arts; Ghanaian Language; French Language (Supplementary); Physical Education; Our World and Our People (OWOP).

TEACHER'S YEARLY COVERAGE CHECKLIST

- Use the official NaCCA Basic 2 subject curriculum to expand the cited official/family references into detailed lesson plans and complete exemplar wording.
- Ensure Weeks 1-10 in every term include learner-centred practical, inquiry, communication and problem-solving experiences rather than note copying only.
- Use Week 11 to remediate actual learner gaps identified through exercises, projects, oral work, quizzes and practical tasks.
- Use Week 12 for cumulative assessment, correction, feedback and recording of strengths/weaknesses.
- Treat the Computing and French sections as school-added introductory programmes; do not report their SUP-B2 codes as NaCCA-issued Basic 2 indicator codes.
- Where OWOP is not separately timetabled under current school policy, its activities may be mapped into related subjects in line with current NaCCA/GES guidance.

Curriculum basis: National Council for Curriculum and Assessment (NaCCA), Standards-Based Curriculum (2019), Lower Primary Basic 1-Basic 2 subject curricula. French and Computing are included as requested school-added transition subjects.
